

# Mitutoyo Service

One toolkit to install, calibrate, and maintain Mitutoyo CMM controllers

Mitutoyo Service is a professional, guided Windows workspace engineered specifically for CMM service companies, independent calibrators, and retrofitters. It provides field technicians with a comprehensive suite of tools to service Mitutoyo controllers efficiently, allowing you to bypass OEM dependencies, scale your service operations, and reduce operational risks through a secure, per-feature online licensing ecosystem.

*Guided wizards consolidate geometric compensation, EEPROM, firmware, and live diagnostics in one workspace.*

## FEATURES & CAPABILITIES

### Error Mapping Geometric Compensation

Perform precise 21-parameter (GCOM), squareness (XY/XZ/YZ), and linear scale factor corrections effortlessly via guided wizards.

### Firmware & Setup

Manage ROM/firmware programming, adjust real-time clocks, and configure multi-channel temperature compensation parameters.

### Traceability Logs

Maintain an automatically generated onscreen activity log recording every technician action for absolute service transparency and audit readiness.

### Controller Memory Backup

Access manual read/write functions and menu settings, or safeguard hardware states with one-click full backups and restores.

### Live Connectivity

Instantly connect, initialize, and diagnose Mitutoyo UC200 and UC400 controllers with real-time, live machine-status indication.

## WHY IT MATTERS TO YOUR BUSINESS

---

- **Vendor Independence:** Liberate your business from OEM constraints. Calibrate and maintain leading Mitutoyo hardware independently, allowing you to win new accounts and service machines you previously could not support.
- **Shorter, Highly Efficient Service Visits:** By consolidating every critical programming, compensation, and diagnostic operation into a single, unified Windows workspace, your field engineers can execute calibrations dramatically faster.
- **Drastic Risk Mitigation:** Eliminate accidental data loss or setup corruption. Technicians can perform a full, one-click backup of the entire controller state before touching a single configuration parameter, ensuring an instant fallback point.
- **Unmatched Purchasing Flexibility:** Align software costs directly with your service pipeline. Like our Mapper solution, Mitutoyo Service features flexible online licensing.
- **Zero-Friction In-Field Activation:** No messy file exchanges or delayed email responses. Technicians can redeem license keys directly inside the application workspace for instant feature unlocking while onsite.

### Get Started with Mitutoyo Service

## ABOUT EASYCMM

---

EasyCMM is a pioneering technology company dedicated to revolutionizing the Coordinate Measuring Machine (CMM) industry. With over 40 years of experience in metrology, we leverage our deep technical expertise and strong partnerships with leading CMM vendors and service providers. Our innovative solutions enable seamless integration and interoperability across various CMM brands and software, reducing costs and enhancing efficiency for our clients. At EasyCMM, we are committed to delivering cutting-edge technology that extends the lifespan of your CMM equipment and optimizes your calibration and retrofitting processes.
